Meets the ASTM standard for Compostability

- Made from 100% renewable bamboo fiber
- Microwave, Freezer & Refrigerator safe
- Grease, Oil and Liquid resistant
- Ovenable to 375 degrees
- Super durable

BAMware

Compostable , 100% natural bamboo fiber

Forests worldwide are endangered and our landfills are full so it is important that we provide alternatives to alleviate the pressure on our woodlands and urban areas. Bamware™, the highest performing disposable fiber products available is your best choice. It's a rapidly renewable tree-free material developed especially for tough food service applications. At EcoGreen Packaging we strive to work with communities and municipalities so our containers, plates and bowls return naturally back to the earth by way of commercial composting facilities rather than sitting in the landfill.
